

MY BATTLE

Temporary Multimedia-Installation 20 – 25 March 2007, Karlsruhe UND#2

the battle is ever present, in each of us, we fight for what we believe in.

my battle is a scenario of conflict, between three evolutionary stages of life and society: revolution the believe that we can change, surrender the moment that we realize that collective change is not possible and death that limits our time to act and constantly weakens us.

At the beginning when we are young we believe we can change the world, make it a better place; than we realize by getting older that in our one dimensional system there is no space for revolution, hopeless we surrender our collective beliefs, and realize that there is only space for individual change. This process is not linear, hope always existst but our strenght to fight is weakend by the passing of time .Till one day we die .

we fight to change the world

we fight against surrender

we fight death

the installation is going to be built up site specific to the location, the artist build up a battelfield in two days with the following materials.

200 newspaper bricks
